

Geography Curriculum 2025-2026

	Half Term 1	Half Term 2	Half Term 3	Half Term 4	Half Term 5	Half Term 6
Year 7	What is geography and what makes an exceptional geographer?	Why are our ecosystems valuable and what are their biggest threats?	How has our planets population changed over time and what are the impacts of this on settlement?	How does weather and climate differ and what are the causes and impacts of some of our extreme weather?	How does Africa create opportunities and challenges?	What factors influence our physical landscapes and how are they shaped by physical processes?
Year 8	What are the factors influencing globalisation and how has globalisation impacted LIC's and NEE's?	How are resources distributed around the globe and what factors influence the demand both now and in the future?	How do world cities create opportunities and challenges?	How do fluvial processes impact our physical landscapes and how are we managing our hazards?	How do plate tectonics influence the earths landscape and impact the living world?	How do fluvial processes impact our physical landscapes and how are we management our hazards?
Year 9	How has urban change created opportunities and challenges in the UK?	How has urban change created opportunities and challenges in LIC/NEE cities?	Why and how should we protect our living world?		How are resources distributed globally and in the UK?	To what extent are humans the cause of and the solution to climate change?
Year 10	Why are some countries more developed than others and how can we reduce the development gap?	Why is Nigeria (a NEE) important and what are the opportunities and challenges of its economic development?	What challenges do tectonic hazards present and how can we manage them?	To what extent do weather hazards affect people and the environment in the UK and the wider world?	How has the UK's economy changed over time?	<p>FIELDWORK: How does the river at Carding Mill Valley change as it travels downstream?</p> <p>To what extent are humans the cause of and the solution to climate change?</p>
Year 11	How do rivers shape the landscape of the UK and how can they be managed?	How do physical and human processes affect coastal landscapes in the UK?	How are resources distributed globally and in the UK, and how can we ensure food security is sustainable?	<p>Why and how should we protect the rainforests?</p> <p>How and why should we protect cold environments?</p>	<p>Pre-release preparation</p> <p>How has urban change in Rio de Janeiro created opportunities and challenges?</p>	Revision
